AR (Augmented Reality) Filter Menu

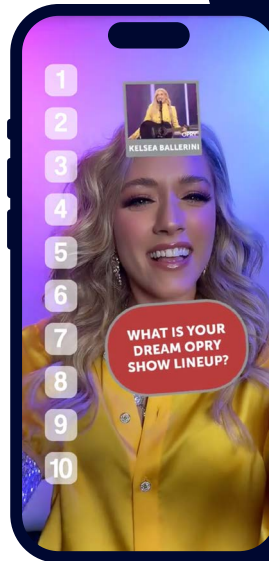

available on TikTok and Snapchat

Blind Ranking Filter

10 items in a category of your choice display on the screen in random order. The user has to choose where to rank them 1-10 without knowing what is coming next.

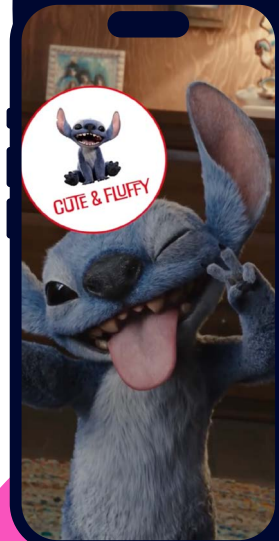

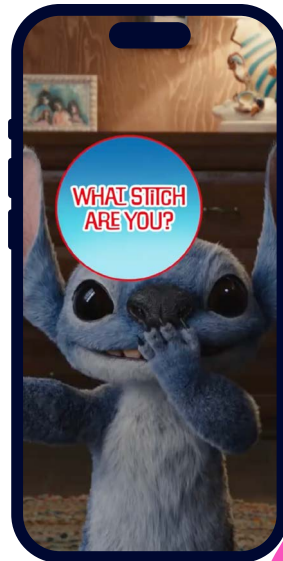

Starting at \$2,000

Single Result Randomizer Filter

Randomizer with one prompt that spins multiple potential options to ultimately reveal one result i.e. "What ___ are you?"

Starting at \$1,000

AI Transformation Filter

CapCut-style effect where the user takes a photo in-app that gets morphed into the style of any type of fictional character, animation, artistic movement, etc.

Starting at \$1,500

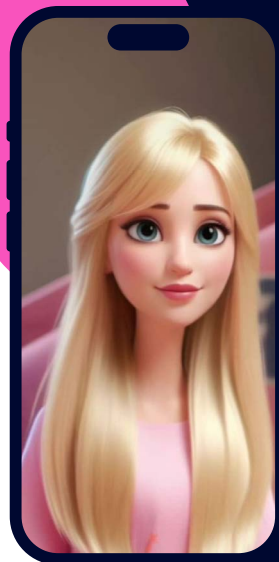

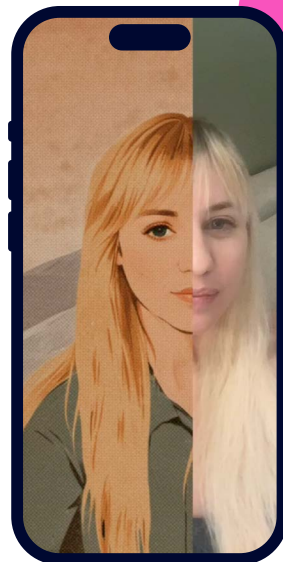

Photo Dump Style Filter

Timed photo montage with user's selected content, very similar to a CapCut template. Can also include lyrics on the screen, also timed with the audio.

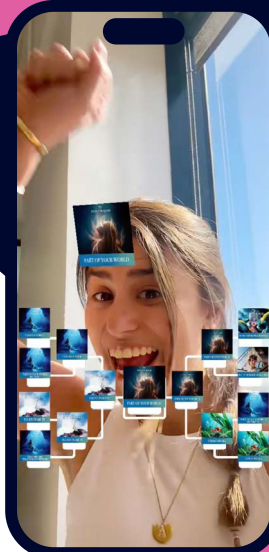

Starting at \$1,500

Tournament Bracket Filter

User has to choose between 2 options in a category of your choice, which will appear in random order. Each selection then goes head-to-head in the bracket below until the user has to choose between their top 2 selections.

Starting at \$2,500

“Place People on the Screen” Filter

Similar to a blind ranking filter, but creating a scenario on the screen where the user has to select where each option should be placed. Works well for fake “seating charts.”

Starting at \$2,500

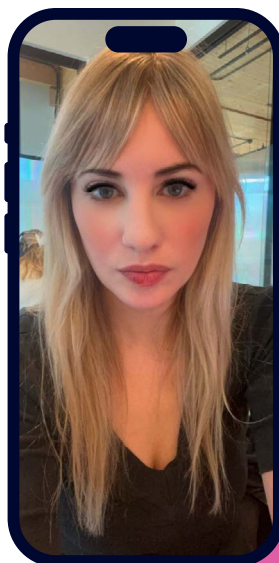

Makeup Filter

Add makeup to the user's face. Can also add interaction such as the user tapping the screen to change elements of the makeup. We can create full makeup looks, or just change individual elements such as lip color.

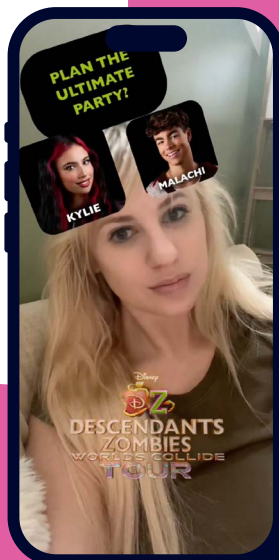

Starting at **\$1,500**

'This or That?' Filter

User chooses between 2 randomized results throughout a series of questions by tilting their head left or right.

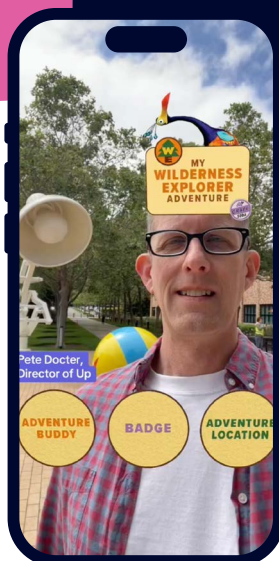

Starting at **\$2,000**

Multiple Result Randomizer Filter

Randomizer in classic form (visibly cycling through the multiple potential options) to ultimately reveal multiple results.

Starting at **\$1,500**

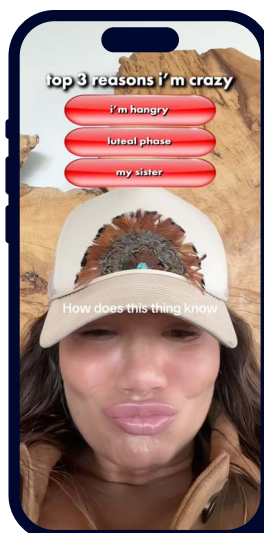

Multiple Randomizer Filter – Alternate Visual Build

Randomizer in any custom visual format that reveals multiple results. In this example, the red tabs slowly flip over to reveal the 3 randomized results. We can make it function and appear however you envision it.

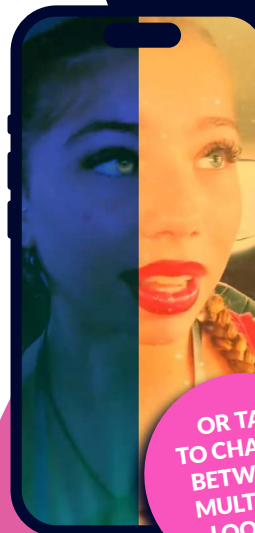

Starting at **\$2,000**

“Aesthetic” Filter

Filter that matches any type of art or aesthetic by placing the user into a custom background or changing the overall visual effect of the screen (B&W, any specific color lighting, etc.)

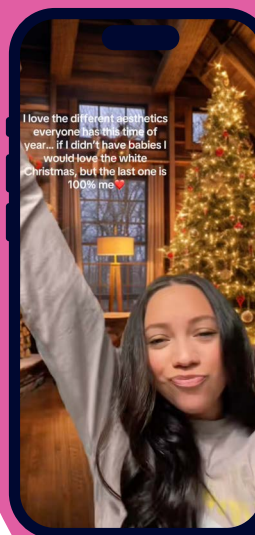

Starting at **\$1,500**

Background/World Changing Filter

Background-replacement filter that places the user in a custom setting. Can also add a tap-to-change element that cycles through multiple backgrounds.

Starting at **\$1,500**

**Interested in a game or other type of filter not listed above?
We can make it happen - reach out for a custom quote!**
